

Vivek Anand

Software Developer Intern

SUMMARY

Frontend-focused Full-Stack web Developer with Gen-Ai expertise delivering real-world products at scale. Experienced in scalable React apps, AI-powered features and fast-paced startup environments.

SKILLS

Category	Details
Programming Languages	JavaScript, Typescript, C++
Frameworks and Libraries	Next.js, React.js, Redux, Node.js, Express.js, TailwindCSS, Framer Motion
Database and ORMs	MongoDB, MySQL, Supabase, NeonDB, Prisma, Mongoose, QdrantDB, Pinecone DB
Tools and Platforms	AWS, Lambda, S3, EventBridge Scheduler, Git, GitHub, Postman, Firebase, Clerk, Microsoft Clarity
Gen AI	Langchain, Langraph, OpenAI Agent SDK, Vector Database, Advance RAG Pipelines, Memory

PROJECTS

Samvad AI

- Built an AI meeting assistant SaaS that auto-joins Zoom, Google Meet, and Teams calls to record conversations and generate structured summaries with actionable insights.
- Enabled users to chat with past meetings, search discussions, and automate workflows by syncing action items to tools like Jira, Asana, and Trello, with smart scheduling via calendar integration.

Next.js, Typescript, Prisma, AWS (Lambda + S3 + EventBridge Scheduler), OpenAI API

Askly AI

- Built a production-ready RAG system enabling users to chat with PDFs, websites, and YouTube content.
- Designed document chunking and embedding pipelines using Qdrant Vector Database for fast semantic search.

Next.js, LangChain, OpenAI API (GPT-4 + Embeddings), Qdrant Vector DB, Clerk, Tailwind CSS

Skill Nest

- Developed a full-stack EdTech platform enabling users to sign up, log in, and purchase online courses.
- Implemented secure authentication using JWT with role-based access for students and instructors.

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

EXPERIENCE

Software Developer Intern - Waegoo

2026-01 - 2026-04

- Architected and developed the complete frontend infrastructure along with Admin, Client, and Partner dashboards.
- Integrated and optimized backend API connections, implementing efficient data fetching strategies and error handling mechanisms.
- Enhanced user experience and interface design through implementation of consistent design systems, accessibility standards, and performance optimizations.

Frontend Developer Intern - Asan Innovators

2025-04 - 2025-08

- Developed and maintained core frontend features for Asandev Nest using React.js and Tailwind CSS.
- Built reusable UI components and integrated REST APIs, ensuring scalability and maintainability.

Software Developer Intern - Escenems Technologies

2024-08 - 2025-02

- Built Vedic Rashi, an AI-powered full-stack platform using React.js, Node.js, and Firestore.
- Implemented AI chat, automated reports, Razorpay payments, and analytics tracking; deployed as a PWA.
